“FoodCatNo” is intended as a harmonised naming system for food category as an alternative to the use of the food category name.

“Food Category” is hierarchical and applies to all foodstuffs. The system includes 16 main categories and a description of the foods covered by each food category according to the table of the annex II; part 1 of this Notification.

“Functional Class” is group of technological purposes of food additive.

“INS” is intended as a harmonised naming system for food additives as an alternative to the use of the specific name.

“Maximum use Levels” is the highest concentration of the additive determined to be functionally effective in a food or food category. It is expressed as mg additive/kg of food (ppm).

“GMP” is the quantity of the additive added to food shall be limited to the lowest possible level necessary to accomplish its desired effect under conditions of good manufacturing practice (GMP).

“Notes” is special conditions applying to the use of food additives according to the table of the annex II; part 2 of this Notification.

“Year Adopted” is B.E. year of provision has been adopted.

Annex II

Attachment to the Notification of the Ministry of Public Health (No. 281) B.E. 2547 (2004),
Re: Food Additives as revised by the Notification of the Ministry of Public Health (No. 468)
B.E. 2566 (2025), issued by virtue of the Food Act B.E. 2522, Re: Prescribing the Principles,
Conditions, Methods, and Proportions of Food Additives (No. 4)

Part 1: Food Category System

01.0	Dairy products and analogues
	Includes all types of plain and flavoured dairy products that are derived from the milk of any milking animal (e.g. cow, sheep, goat, and buffalo). <u>Note:</u> a “plain” product is one that is not flavoured, nor contains fruit, vegetables or other non-dairy ingredients, nor is mixed with other non-dairy ingredients, unless permitted by relevant standards. Analogues are products in which milk fat has been partially or wholly replaced by vegetable fats or oils.
01.1	Fluid milk and milk products
	Includes all plain and flavoured fluid milks based on skim, part-skim, low-fat and whole milk. Excluding plain fermented products and plain renneted milk products of food category 01.2
01.1.1	Fluid milk (plain)
	Plain fluid milk obtained from milking animals (e.g., cows, sheep, goats, and buffalo) that has been processed. Includes pasteurized, ultra-high temperature (UHT) treated, sterilized ¹³ , homogenized, or fat adjusted milk. Includes, but is not limited to, skim, part-skim, low-fat and whole milk.
01.1.2	Other fluid milks (plain)
	Includes all plain fluid milk, but is not limited to, plain recombined fluid milks, plain reconstituted fluid milks, plain composite milks, non-flavoured vitamin and mineral fortified fluid milks, protein adjusted milks, lactose reduced milk, and plain milk-based beverages. In this food category, plain products contain no added flavouring nor other ingredients that intentionally impart flavour, but may contain other non-dairy ingredients. Excluding products of food categories 01.1.1 Fluid milk (plain), 01.1.3 Fluid buttermilk (plain), and 01.2 Fermented and renneted milk products (plain).

01.1.3	Fluid Buttermilk (plain)
	Fluid buttermilk is the nearly milkfat-free fluid remaining from the butter-making process. Fluid buttermilk is also produced by fermentation of fluid skim milk, either by spontaneous souring by the action of lactic acid-forming or aroma-forming bacteria, or by inoculation of heated milk with pure bacterial cultures (cultured buttermilk). Fluid buttermilk may be pasteurized or sterilized.
01.1.4	Flavoured Fluid Milk Drinks
	Includes all mixes and ready-to-drink fermented or not fermented milk-based drinks with flavourings and/or food ingredients that intentionally impart flavour, including whey-based drinks, and lassi (liquid obtained by whipping curd from the lactic acid fermentation of milk, and mixing with sugar or intense sweetener) and similar products. Excluding mixes for cocoa (cocoa-sugar mixtures) in category 05.1.1.
01.2	Fermented and renneted milk products (plain)
	Includes all plain fermented or renneted products based on skim, part-skim, low-fat and whole milk. Excluding flavoured products are included in category 01.1.4 (beverages) and 01.7 (desserts).
01.2.1	Fermented milks (plain)
	Includes all plain products, including fluid fermented milk, acidified milk and cultured milk. Plain yoghurt and plain drinks based on fermented milk, which do not contain flavouring or colours, may be found in sub-categories depending on whether it is heat-treated after fermentation or not.
01.2.1.1	Fermented milks (plain), not heat-treated after fermentation
	Includes fluid and non-fluid plain products, which do not heat-treated after fermentation.

The juice may be cloudy or clear, and may have restored (to the normal level attained in the same kind of fruit) aromatic substances and volatile flavour components, all of which must be obtained by suitable physical means, and all of which must have been recovered from the same kind of fruit. Pulp and cells obtained by suitable physical means from the same kind of fruit may be added. This can be classified to three types as follows; 1. Fruit juice directly expressed by mechanical extraction processes such as pressing or squeezing etc.; 2. In the production of juice that is to be concentrated, suitable processes are used, and may be combined, with simultaneous diffusion of the pulp cells or fruit pulp by water, provided that the water-extracted soluble fruit solids are added in-line to the primary juice, before the concentration procedure. Fruit juice concentrates may have restored (to the normal level attained in the same kind of fruit) aromatic substances and volatile flavour components, all of which must be obtained by suitable physical means, and all of which must be recovered from the same kind of fruit. Pulp and cells obtained by suitable physical means from the same kind of fruit may be added.
