

Notification of the Ministry of Public Health
(No. 445) B.E. 2566 (2023)
Issued By the Virtue of Food Act B.E. 2522 (1979)
Re: Nutrition Labelling

Whereas it is expedient to amend the Notification of the Ministry of Public Health regarding Nutrition labelling, so as to provide consumers with the information of the types of nutrients and their contents in food as well as comparing the nutrient contents between the same food categories. This aims to encourage a prudent choice of buying and consumption of food that benefits consumers' health in order to protect consumers in the area of nutrition.

By virtue of the first paragraph of Section 5 and Section 6(10) of the Food Act B.E. 2522 (1979), the Minister of Public Health hereby issued the Notification as follows.

Clause 1. To repeal,

(1) The Notification of the Ministry of Public Health (No. 182) B.E. 2541 (1998)
Re: Nutrition Labelling, dated 20th March B.E. 2541 (1998)

(2) The Notification of the Ministry of Public Health (No. 219) B.E. 2544 (2001)
Re: Nutrition Labelling (No. 2), dated 21st June B.E. 2544 (2001)

(3) The Notification of the Ministry of Public Health (No. 392) B.E. 2561 (2018)
Issued by the Virtue of Food Act B.E. 2522 (1979) Re: Nutrition Labelling (No. 3), dated 14th September B.E. 2561 (2018)

Clause 2. In this notification,

“Nutrition labelling” means a description of nutritional properties of a food which is composed of information on energy and nutrient contents on the label according to the formats and conditions prescribed in the Annex of this notification.

“Foods which have nutrition claim” means foods with declaration of statement, image, mark, symbol, trademark or any information that related to type of nutrient or nutrient content or comparative nutrient content in a direct or indirect representation. However, it does not include any food which requires to define its nutrient

type and nutrient content as prescribed by their particular the Notification of the Ministry of Public Health.

“Foods which have health claim” means foods with declaration of statement, image, mark, symbol, trademark or any information related to a relationship between a food or a constituent of food and health both directly and indirectly.

“Foods which utilizing food value in sale promotion” means foods with declaration of statement, image, mark, symbol, trademark or any information related to benefits or properties of the food product, or a constituent of food or any nutrients contained in the food product with an effect to the body or health for the purposes of sale promotion.

“ Nutrients” means nutrients prescribed in Appendix No. 3 attached to this Notification. It also includes the energy and the sub-nutrients that are prescribed in the Annex No. 3 of this Notification.

Clause 3. The following foods are required to declare a nutrition labelling:

- (1) Foods which have nutrition claim,
- (2) Foods which have health claim,
- (3) Foods which utilizing food value in sale promotion,
- (4) Other foods to be notified by the Minister

Clause 4. Nutrition labelling shall be declared in Thai language but other foreign languages could be included. It shall conform to the criteria and conditions prescribed in Appendices attached to this Notification as follows:

- (1) Appendix No.1: Formats and conditions to declare nutrition labelling.
- (2) Appendix No.2: Method to define the amount of food per serving size and the quantity of serving per container.
- (3) Appendix No.3: Thai recommended daily intakes.
- (4) Appendix No.4: Criteria for nutrition claims on food label.

Clause 5 Food labelling as stipulated in Clause No. 3 shall follow the Notification of Ministry of Public Health Re: Labeling of Prepackaged Foods and shall declare nutrition labelling as prescribed in this Notification.

Clause 6. Foods with the nutrition labelling prior to the enforcement of this Notification shall continue to be sold in the market by following the requirements of the Ministry of Public Health Notification (No. 182) B.E. 2541 (1998) Regarding: Nutrition labelling. However, it shall not be over the period of three years after the date of enforcement of this Notification.

Clause 7. This Notification shall not enforce to the followings:

(1) Food for Infants, and Food for Infants with Specific Medical Needs, Food of Follow up Formula for Infant in the age of six to twelve months, and Food for Young Children, Supplementary Food for Infants and Young Children, Food with Specific Purposes and other foods with the nutrient declaration requirements as prescribed in their particular Notification.

(2) Foods which are not directly sold to consumers or food that are sold directly by the cookers to consumers or food which are not produced or imported to be sold domestically.

(3) Foods in their individual container which are intended to be packed together and sold in a large container.

Clause 8. This Notification shall come into force after 180 days as from the following date of its publication in the Government Gazette.

Notified on 17th November B.E. 2566 (2023)

Cholnan Srikaew

Minister of Public Health

Annex 1

Attached to the Notification of Ministry of Public Health (No. 445) B.E. 2566 (2023)

Issued by the virtue of Food Act B.E. 2522 Re: Nutrition Labelling

Nutrition labelling: Format and required conditions

1. **Formats of the nutrition labelling** shall comply with either one of these following formats as provided. Other formats need to be approved by the Food and Drug Administration.

1.1 Standard format of nutrition labelling

ข้อมูลโภชนาการ	
กินได้ ครั้ง ต่อ	
คุณค่าทางโภชนาการต่อการกินหนึ่งครั้ง:(....)	
พลังงาน	 กิโลแคลอรี

*ร้อยละของค่าอ้างอิงสารอาหารต่อวันสำหรับคนไทย จากความต้องการพลังงาน วันละ 2,000 กิโลแคลอรี (Percent Thai Reference Daily Intakes, based on a 2,000 kcal)	

Remark: 1. Fill in the blanks “.....” of the declare format.

2. In case of foods which intended to declare the amount per serving of 100 grams or 100 ml, the declaration of “.....serving(s) per...container....” shall be exempted and “amount per 100 grams” or “amount per 100 ml” shall be declared instead.

3. The declaration of the nutrition labelling in a foreign language shall have a text or statement in accordance with the formats in Thai language. This declaration of other languages could be displayed in the same frame as the Thai version at the same position attached with Thai language or display as a separate frame. This condition shall apply for all formats No. 1.1 – 1.7.

2. Conditions for displaying the nutrition labelling

2.1 To display the nutrition labelling, the background shall be in white. The font color shall be visible and legible using the same color as the frame of the nutrition labelling.

The font size shall be as follows:

	Statement	Required style and height
Section 1	Nutrition information	Bold with a height of not less than 1.5 millimeters.
	serving(s) per ...container...	
Section 2	Amount per serving:(....)	
	Energy and kilocalorie	
	Numerical value of the energy	
Section 3 Part 1	Total fat, Cholesterol, Protein, Total carbohydrate, Sodium and Potassium Numerical value of the nutrient content and percentage of Thai RDI	Bold with a same height of not less than 1 millimeter.
	Saturated fat, Total sugars, Numerical value of the nutrient content and percentage of Thai RDI	A Height of not less than 1 millimeter.
	Part 2 Types of vitamins and minerals Numerical value of the nutrient content in percentage of Thai RDI	A height of not less than 1 millimeter.
Section 4	*Percentage of Thai Reference Daily Intakes, based on a 2,000 kcal	A height of not less than 1 millimeter.
Section 5	The value of the energy and nutrient required per day and conversion factors for the calculation of energy value	A height of not less than 1 millimeter.

2.2 All information of nutrient contents and energy values defined in each format of the nutrition labelling shall be declared even though the numerical values of that nutrient or energy may be considered as insignificant due to the conditions outlined No. 2.6 of this Annex.

2.3 To declare information of the nutrients other than those required in each format of the nutrition labeling but is listed in the Annex 3 of this Notification, whether the nutrients are naturally occurred, or fortified and stated on the label, or contained in a significant amount and intended to declare in the nutrition labelling, the sequence of nutrients shall be as follows:

Section 3 Part 1	Total fat* Saturated fat* Trans fatty acid Monounsaturated fatty acid Polyunsaturated fatty acid Cholesterol* Protein* Total Carbohydrate* Total sugars* Sugar Alcohols** Other types of carbohydrates Dietary Fiber** Soluble fiber Insoluble fiber Sodium* Potassium*
Section 3 Part 2	Vitamins and minerals that prescribed in Annex 3 shall be expressed in a percentage of Thai RDIs by displaying a group of vitamins first follow by a group of minerals. The values in percentage shall be declared in a descending order.

Remark *mandatory nutrients to be declared in the standard format of the nutrition labelling

**Their contents shall be displayed in the nutrition labelling if the energy value was calculated from total carbohydrate using the approach stated in No. 2.4 2) 2.2).

To declare the nutrients that are not listed in Annex 3 and are not prescribed in No. 2.3, the type of nutrients and its content per the amount of consumed per serving on the label shall be declared below and outside of the nutrition labelling.

- 1) Vitamin A
- RAE = Retinol Activity Equivalents
- 1 mcg RAE = 1 mcg retinol
- = 3.33 IU retinol (1 IU Retinol = 0.3 mcg Retinol)
- = 12 mcg β-carotene
- = 20 IU β-carotene
- (1 IU Beta-carotene = 0.6 mcg β-carotene)
- = 24 mcg α-carotene, 24 mcg β-cryptoxanthin

2) Niacin NE = Niacin Equivalent

1 mg NE = 1 mg niacin
 = 60 mg tryptophan

3) Vitamin E α -TE = α -Tocopherol Equivalent

1 mg α -TE = 1 mg D- α -tocopherol = 1.5 IU

1 mg α -TE = 1 mg d- α -tocopherol
 = 1 mg RRR- α -tocopherol = 1.5 IU
 = 2 mg *all-rac*- α -tocopherol = 2.22 IU

4) Vitamin D 1 μ g cholecalciferol = 40 IU vitamin D

5) Folate DFE = Dietary Folate Equivalent

1 μ g DFE = 1 μ g food folate
 = 0.6 μ g folic acid added to food

2.6 Rounding rules for the numerical values of the nutrient declaration on the nutrition labelling

Energy and nutrients	Unit	Results from the analysis	Declared nutrient content per serving*	Results from the calculation of %Thai RDI**	Declared nutrient content as %Thai RDI	Amount that considered as insignificant
Energy Energy from fat	kilocalorie	< 5 5 - < 50 ≥ 50	Declared as 0 Rounded up/down as a step of 5 Rounded up/down as a step of 10	Calculated from rounded numerical value of the nutrient contents per serving	Rounded to the nearest whole number; except from protein, total sugars and trans fatty acid, they do not need to declare as %Thai RDI	< 5 kcal
Total fat Saturated fat	gram	< 0.5 0.5 - < 5 ≥ 5	declared as 0 Rounded up/down as a step of 0.5 Rounded up/down as a step of 1			< 0.5 g
Trans fatty acid	gram	0 < 0.5 0.5 - < 5 ≥ 5	Declared as 0 Declared as “less than 0.5” Rounded up/down as a step of 0.5 Rounded up/down as a step of 1			< 0.5 g
Cholesterol	milligram	< 2 2 - < 5 ≥ 5	Declared as 0 Declared as “less than 5” Rounded up/down as a step of 5			< 2 mg
Protein, Total carbohydrate, Fiber, Total sugars	gram	< 0.5 0.5 - < 1 ≥ 1	Declared as 0 Declared as “less than 0.5” Rounded up/down as a step of 1			< 1 g (for total sugars < 0.5 g)
Sodium, Potassium	milligram	< 5 5 - 140 > 140	Declared as 0 Rounded up/down as a step of 5 Rounded up/down as a step of 10			< 5 mg
Vitamins and minerals (except Sodium and Potassium)			Do not need to be declared	Calculated from the nutrient contents per serving	5 - 50 Rounded up/down as a step of 5 > 50 Rounded up/down as a step of 10	< 5 % of Thai RDI

*It shall be declared as per serving size. If a food product's reference serving size is undefined because it cannot be classified into any food category or lacks a specified reference serving size, the manufacturer may choose to define the serving size as appropriate for individual products or serving size of 100 grams or 100 ml could be used instead.

** Recommended Daily Intake means Thai Reference Daily Intakes or Thai RDIs

“>” means “more than” “<” means “less than” “≥” means “more than or equal to” “≤” means “less than or equal to”

Annex 2

Attached to the Notification of Ministry of Public Health (No. 445) B.E. 2566 (2023)

issued by the virtue of Food Act B.E. 2522 (1979) Re: Nutrition labelling

Approaches on defining “the amount consumed per serving and “the number of servings per container.”

1. Serving size or the amount consumed per serving means is the amount of food that the average Thai individual typically finishes at each time of consuming. The declared amount of food on the label is the amount that food manufacturers recommend to consume at each time or so-called “amount consumed at each time”.

The amount of serving size can be defined using the “reference serving size” which is the amount of food in weight or volume consumed at arch time based on the data from the survey on the consumption behavior and from what recommended by the food producers. Although the serving size may differ from the reference serving size, it must nonetheless comparable to the prescribed value in accordance with the guidelines.

2. The number of serving per container or the number of consumption per container means the number of times that the food could be consumed per one container or shall be called as “.....serving (s) per.....”

3. The Table of the reference Serving Size for food products was divided into 14 food categories classified by the product characteristic or how the products are normally consumed according to the results of the survey on the Food Consumption Data of Thailand B.E. 2559 (2016) written by National Bureau of Agricultural Commodity and Food Standards and the Guidelines for defining reference serving size written by USFDA as follows;

- 1) Dairy products and substitutes
- 2) Beverages
- 3) Snack foods
- 4) Desserts
- 5) Semi- processed food products and ready-to-cook food products
- 6) Baked, steamed and fried products
- 7) Cereals, legumes, seeds and products
- 8) Ready-to- eat food products
- 9) Meat, fish, others aquatic animals, eggs and products
- 10) Vegetables

- 11) Fruits
- 12) Sauces, condiments, spread products and other products
- 13) Fats, oils and products
- 14) Miscellaneous

Unofficial translation

Category 1 Dairy products and substitutes

No.	Food Category		Reference Serving Size
1	นม ผลิตภัณฑ์นม และเครื่องดื่มที่มีนมเป็นส่วนประกอบหลัก ชนิดพร้อมดื่ม	Milk, milk-substitute beverages, milk-based drinks	200 milliliters
2	นม ผลิตภัณฑ์นม และเครื่องดื่มที่มีนมเป็นส่วนประกอบหลัก ชนิดแห้ง	Milk, milk-substitute beverages, milk-based drinks, powder	Defined amount for preparing 1 glass of beverage (200 milliliters)
3	นมเปรี้ยวชนิดพร้อมดื่ม	Fermented milk, ready-to-drink	150 milliliters
4	โยเกิร์ตชนิดครีม	Yoghurt, cream	150 grams
5	โยเกิร์ตแช่แข็ง	Yoghurt, frozen	80 grams
6	นมข้นไม่หวาน ผลิตภัณฑ์นมข้นจืด และครีมเทียมข้นจืด	Milk, unsweetened, condensed, evaporated, and undiluted creamer	30 milliliters
7	นมข้นหวาน ผลิตภัณฑ์นมข้นหวาน และครีมเทียมข้นหวาน	Milk, sweetened, condensed and sweetened creamer	20 grams
8	ครีมและครีมเทียม ชนิดผง	Cream or cream substitutes, powder	3 grams
9	ครีมและครีมเทียม ชนิดเหลว	Cream or cream substitutes, fluid	15 milliliters
10	ครีมพว่องมันเนย	Cream, half	30 milliliters
11	ครีมเปรี้ยว	Sour cream	30 grams
12	ครีมชีสและชีสสเปรด	Cream cheese and cheese spread	30 grams
13	เนยแข็งชนิดคอตเตจ	Cheese, cottage	110 grams
14	เนยแข็งชนิดรีคอตตา และคอตเตจ ชนิดแห้ง	Cheese, used primarily as ingredients, e.g., ricotta cheese, dry cottage cheese	55 grams
15	เนยแข็งชนิดพาร์มีซาน โรมานโน	Cheese, grated hard, e.g., Parmesan, Romano	5 grams
16	เนยแข็งชนิดอื่น	Cheese, others	30 grams
17	นมอัดเม็ด และผลิตภัณฑ์ที่ใช้แทนนมอัดเม็ด	Milk candies and milk candies substitutes	6 grams

Category 2 Beverages

No.	Food Category		Reference Serving Size
1	เครื่องดื่มจากพืช ผัก ผลไม้ ธัญพืช และอื่น ๆ	Beverages from vegetables, fruits, cereals and others	200 milliliters
2	เครื่องดื่มที่มีหรือไม่มีก๊าซผสมอยู่ (รวมทั้งน้ำบริโภคและน้ำแร่) และเครื่องดื่มอื่น ๆ	Carbonated and non-carbonated beverages, (including water and mineral water) and other beverages	200 milliliters
3	เครื่องดื่มชนิดผง หรือชนิดเข้มข้น ที่ต้องเตรียมก่อนบริโภค	Beverages, powder or concentrated, prepared before consumption	Defined amount for preparing the beverage of 200 milliliters
4	ชา กาแฟพร้อมดื่ม (ร้อนหรือเย็น) (ก่อนผสมน้ำแข็ง)	Coffee and tea, ready-to-drink (hot or cold)	200 milliliters
5	ชา กาแฟ ชนิดผง หรือชนิดเข้มข้น ที่ต้องเตรียมก่อนบริโภค	Coffee and tea, powder or concentrated, prepared before consumption	Defined amount for preparing the beverage of 200 milliliters

Category 3 Snack foods

No.	Food Category		Reference Serving Size
1	มันฝรั่งทอดหรืออบกรอบ ข้าวโพดคั่ว ทอดหรืออบกรอบ ข้าวเกรียบ หรืออาหารขบเคี้ยวชนิดอบพองที่มีและไม่มีส่วนผสมอื่น เช่น ถั่ว นัต และผลไม้แห้ง เป็นต้น ข้าวพอง ข้าวแต่น นางเล็ด ข้าวอบกรอบ ทองม้วน ขนมปั้นขลิบ	Potato chips, popcorns, extruded snacks with or without other ingredients, rice-based snacks, coconut roll waffle (<i>Tong Muan</i>), <i>Pun Klib</i>	30 grams
2	ผัก ผลไม้ ทอด หรืออบกรอบ หรือฉาบ	Fruit-based or vegetable-based snacks	30 grams
3	ถั่วและนัต เช่น ถั่วอบเกลือ เม็ดมะม่วงหิมพานต์อบทอด	Bean and Nuts	30 grams

No.	Food Category		Reference Serving Size
4	เมล็ด เช่น เมล็ดทานตะวัน เมล็ดฟักทอง เมล็ดพืชขนาดเล็กอื่น ๆ	Seeds	15 grams
5	ปลาเส้น ปลาหมึกกรอบ หมูแผ่นกรอบ	Fish sheet, crispy squid, crispy pork	15 grams
6	สาหร่ายปรุงรส	Seaweed, flavored	5 grams

Category 4 Desserts

No.	Food Category		Reference Serving Size
1	ขนมที่ทำจากธัญพืช ถั่ว นัต ทั้งชนิดที่มีและไม่มีไส้หรือเคลือบ เช่น คุกกี้ธัญพืช ถั่วตัด ธัญพืชอัดแท่ง	Grain-based bars with or without filling or coating e.g., Granola bars, cereal bars	30 grams
2	ช็อกโกแลต โกโก้ และผลิตภัณฑ์	Chocolate, cocoa and products	30 grams
3	คัสตาร์ด พุดดิ้ง เต้าหู้นมสด วุ้นสำเร็จรูป ขนมไทย เช่น บัวลอย ก๋วยเตี๋ยววุ้น ข้าวเหนียวถั่วดำ	Custards, pudding, fresh tofu milk, jelly-based drink, Thai-style desserts	150 grams
4	ขนมเนื้อมะพร้าว/กวน มี/ไม่มีกะทิ มี/ไม่มีไส้ เช่น สังขยา วุ้นกะทิ หม้อแกง ถั่วกวน เผือกกวน ขนมกล้วย-มัน-ฟักทอง ขนมใส่ไส้ ขนมชั้น ขนมตาล ถั่วแปบ	Thai-style desserts, with or without coconut, with or without filling	50 grams
5	ขนมเชื่อม (มันสำปะหลังเชื่อม สาเกเชื่อม เผือกเชื่อม)	Dessert in syrup	50 grams
6	ฝอยทอง ทองหยิบ ทองหยอด เม็ดขนุน	Foi-thong, Thong-yip, Thong-yodd, Med Khanun	30 grams
7	อาลัว วุ้นกรอบ สัมปันนี ทองเอก จำมงกุฏ	Ar-lure, Crispy Jelly, Sum-pun-nee, Thong-ek, Ja-mongkut	30 grams
8	ขนมเยลลี่	Jelly, gummy	20 grams
9	ไอศกรีมนม ไอศกรีมดัดแปลง ไอศกรีมผสม ไอศกรีมหวานเย็น (เช่น เชอร์เบต/ซอร์เบต) รวมทั้งส่วนเคลือบและกรวย	Ice cream, water-based frozen desserts (e.g., sherbet/sorbet), - including coatings and wafers	80 grams
10	ลูกอม ลูกกวาด ทอฟฟี่ อมยิ้ม มาร์ชเมลโลว์	Hard- and soft- candies, Marshmallows	6 grams

Category 5 Semi – processed food products and ready-to-cook food products

No.	Food Category		Reference Serving Size
1	อาหารกึ่งสำเร็จรูป ประเภทบะหมี่เส้นหมี วุ้นเส้น ก๋วยเตี๋ยว ก๋วยจั๊บ	Instant noodles: wheat or rice or mungbean	50 grams
2	อาหารกึ่งสำเร็จรูป ประเภทข้าวต้มโจ๊ก	Instant rice soup or porridge	50 grams

No.	Food Category		Reference Serving Size
3	อาหารพร้อมปรุง ประเภทบะหมี่ เส้นหมี่ วุ้นเส้น ก๋วยเตี๋ยว ก๋วยจั๊บ และอื่น ๆ พร้อมน้ำปรุงรสและเครื่องปรุง	Ready-to-cook noodles (wheat or rice or mungbean) with sauce and seasoning	Noodle of 45 grams The amount of condiments/sauces shall be defined by food producer.

Category 6 Baked, steamed and fried products

No.	Food Category		Reference Serving Size
1	ขนมปัง	Bread	50 grams
2	ขนมปังกรอบ แครกเกอร์ เวเฟอร์ บิสกิต วาฟเฟิลกรอบ	Bread sticks, crackers, wafers, biscuits, crispy waffle	30 grams
3	กรวยไอศกรีม	Ice cream cones	15 grams
4	เค้กชนิดหนัก เช่น ชีสเค้ก เค้กผลไม้ ซึ่งมีส่วนผสมของผลไม้ นัต ตั้งแต่ 35% ขึ้นไป	Heavy cake, e.g., cheese cake, fruit cake with at least 35% of fruit or nuts	80 grams
5	เค้กกาแฟ คัพเค้ก มัฟฟิน เอแคลร์ ครีมพัฟ ชิฟฟอน สปันจ์เค้ก ที่มีหรือไม่มีไอซิ่งหรือไส้	Coffee cakes, cupcake, muffins, éclair, cream puff, chiffon, sponge cake with or without icing or filling	55 grams
6	โดนัทมีไส้หรือเคลือบ	Doughnuts with filling or coating	55 grams
	โดนัทไม่มีไส้หรือไม่เคลือบ	Doughnuts without filling or coating	30 grams
7	บราวนี่	Brownies	50 grams
8	พาย เพสตรี ทั้งชนิดที่มีและไม่มีไส้	Pie, pastries with or without filling	55 grams
9	วาฟเฟิล	Waffles	85 grams
10	แพนเค้ก เครปเค้ก	Pancake, crepe cakes	110 grams
11	คุกกี้	Cookies	30 grams
12	ขนมปุยฝ้าย สาลี่ ขนมไข่	Steamed or baked cakes	30 grams
13	ขนมเปี๊ยะ	Chinese pastry (Khanom Pia)	50 grams

No.	Food Category		Reference Serving Size
14	ซาลาเปา หมั่นโถว	Chinese Bun	60 grams

Category 7 Cereals, legumes, seeds and products

No.	Food Category		Reference Serving Size
1	รำข้าว	Bran	15 grams
2	จมูกข้าว จมูกข้าวสาลี	Rice germ, wheat germ	10 grams
3	ข้าวโอ๊ตดิบ	Oat	20 grams
4	แป้งสาลี แป้งข้าวเจ้า แป้งข้าวเหนียว แป้งท้าวยายม่อม แป้งเมล็ดข้าวโพดบด	Flour or cornmeal	30 grams
5	แป้งข้าวโพด แป้งมันสำปะหลัง แป้งมันฝรั่ง	Starches, e.g., cornstarch, tapioca starch, potato starch	10 grams
6	อาหารเช้าจากธัญพืช - น้ำหนักน้อยกว่า 20 กรัมต่อถ้วย - น้ำหนักระหว่าง 20-43 กรัมต่อถ้วย - น้ำหนักมากกว่า 43 กรัม ขึ้นไปต่อถ้วย	Breakfast cereal, ready-to-eat - weighing less than 20 g per cup - weighing 20 g or more but less than 43 g per cup - weighing 43 g or more per cup	20 grams 30 grams 55 grams
7	พาสต้า มะกะโรนี สปาเกตตี และอื่น ๆ	Pasta, Macaroni, Spaghetti and others	140 grams (cooked) 55 grams (raw) 25 grams (fried)
8	ข้าวเจ้า ข้าวบาร์เลย์ ก๋วยเตี๋ยวเส้นเล็ก เส้นหมี่ ก๋วยจั๊บ บะหมี่ วุ้นเส้น ขนมหุ้น และอื่น ๆ	Grains, e.g., rice, barley, noodles, wheat or rice or vermicelli and others	45 grams (raw) 120 grams (cooked)
9	งาคั่ว	Sesame, roasted	9 grams (1 tablespoon)
10	เต้าหู้	Tofu	50 grams
11	ถั่วหมัก เช่น เทมเป้ ถั่วเน่าญี่ปุ่น	Fermented legumes e.g., Tempeh, Natto	50 grams
12	ถั่วและนัต เช่น ถั่วอบเกลือ เม็ดมะม่วงหิมพานต์อบทอด	Nuts	Refer to the Category 3 Snack foods

No.	Food Category		Reference Serving Size
13	เมล็ด เช่น เมล็ดทานตะวัน เมล็ดฟักทอง เมล็ดพืชขนาดเล็กอื่น ๆ	Seeds	Refer to the Category 3 Snack foods

Category 8 Ready-to-eat food products

No.	Food Category		Reference Serving Size
1	ซุปร่วมบริโภค และแกงต่าง ๆ	Soup or curry, ready-to-eat	200 grams
2	พิซซ่า เบอร์เกอร์ แซนด์วิช	Pizza, burger, sandwiches	120 grams

Category 9 Meat, fish, other aquatic animals, eggs and products*

No.	Food Category		Reference Serving Size
1	อาหารที่บรรจุกระป๋อง ขวด ซอง อลูมิเนียมฟอยล์ หรือถุง ที่ปิดสนิท 1.1 เนื้อสัตว์ ปลา และสัตว์น้ำอื่น ในน้ำ น้ำมัน น้ำเกลือ (ไม่รวมของเหลว) 1.2 เนื้อสัตว์ ปลา และสัตว์น้ำอื่น ในซอส เช่น ซาร์ดีนในซอสมะเขือเทศ 1.3 เนื้อสัตว์ ปลา สัตว์น้ำอื่น และ หนังสัตว์ ทอดแล้วบรรจุแบบแห้ง เช่น ปลาเกล็ดขาวทอดกรอบ แมลงทอด หนังไก่ทอด แคบหมู 1.4 เนื้อสัตว์ ปลา และสัตว์น้ำอื่น ทอดแล้วบรรจุกับของเหลว เช่น หอยลายผัดพริก ปลาตุ๋นสามรส 1.5 ปลาร้า ปลาแอนโชวี	Food packed in canned, bottled, aluminium foil or retort pouch 1.1 Meat, fish and other aquatic animals in water, oil or brine (liquid excluded) 1.2 Meat, fish and other aquatic animals in sauce e.g., sardines in tomato sauce 1.3 Meat, fish other aquatic animals and edible skin, dried and fried 1.4 Meat, fish and other aquatic animals, fried with sauce 1.5 Fermented fish, anchovies	55 grams 85 grams 20 grams 85 grams 15 grams
2	เบคอน	Bacon	15 grams
3	แฮมชนิดต่าง ๆ	Ham	35 grams
4	ไส้กรอกที่มีอัตราส่วนความชื้น:โปรตีน น้อยกว่า 2:1 เช่น กุนเชียง เปปเปอร์นัต	Sausages that have moisture to protein ratio less than 2:1	40 grams

No.	Food Category		Reference Serving Size
	รวมทั้งเนื้อสวรรค์ หมูสวรรค์		
5	ไส้กรอกชนิดอื่น ๆ เช่น ไส้กรอกอีสาน ไส้ฉั่ว ลูกชิ้น แหนม หมูยอ และโปโลนา	Other sausages, meat balls, fermented pork, Vietnamese pork sausage (<i>Mhoo-yor</i>) and Bologna	55 grams
6	เนื้อสัตว์และสัตว์น้ำแห้ง เช่น หมูหยอง เนื้อทุบ หมูแผ่น	Meat, dried	20 grams
7	เนื้อสัตว์และสัตว์น้ำสุก ปิ้งรส ดอง ร่มควัน	Meat, cooked, flavored, pickled or smoked	55 grams
8	ไข่ไก่และไข่เป็ดทั้งฟอง (สุกและดิบ)	Eggs, cooked and raw	1 egg
9	ไข่นกกระทา (สุกและดิบ)	Quail eggs, cooked and raw	4 eggs
10	เต้าหู้ไข่	Egg tofu	50 grams
11	ปลาเส้น ปลาหมึกกรอบ หมูแผ่นกรอบ	Fish sheet, crispy squid, crispy pork	Refer to the Category 3 Snack foods

* รวมถึงผลิตภัณฑ์ทดแทนเนื้อสัตว์ *including meat substitutes products

Category 10 Vegetables

No.	Food Category		Reference Serving Size
1	ผักสุก	Vegetables, cooked	80 grams
2	อาหารที่บรรจุกระป๋อง ขวดแก้วที่ปิดสนิท ของอลูมิเนียมฟอยล์ 2.1 ผัก (ไม่รวมของเหลว) เช่น ถั่วงอกยาวในน้ำเกลือ ข้าวโพดอ่อน ในน้ำเกลือ เห็ดในน้ำเกลือ 2.2 ผักหรือถั่วในซอส	Food packed in canned, bottled, or aluminium foil 2.1 Vegetables (liquid excluded) e.g., yard long bean in brine, baby corn in brine 2.2 Vegetables or beans in sauce	80 grams 130 grams
3	สาหร่ายปรุงอาหาร ชนิดแห้งและสด	Seaweed, dried or fresh	5 grams (dry) 55 grams (raw)
4	สาหร่ายปรุงรส	Seaweed, flavored	Refer to the Category 3 Snack foods
5	ผักแช่ซอสหรือดอง (ไม่รวมของเหลว)	Vegetables, pickled (liquid	20 grams

No.	Food Category		Reference Serving Size
		excluded)	
6	ผักทอด หรืออบกรอบ หรือฉาบ	Vegetable-based snacks	Refer to the Category 3 Snack Foods

Category 11 Fruits

No.	Food Category		Reference Serving Size
1	ผลไม้ (รวมของเหลว)	Fruits (liquid included)	140 grams
2	ผลไม้แช่อิ่มหรือดอง (ไม่รวมของเหลว)	Fruits, pickled (liquid excluded)	30 grams
3	ผลไม้แห้ง เช่น ก๊วยตากับ และผลไม้กวน เช่น สับปะรดกวน มะม่วงกวน	Fruits, dried or candied	30 grams
4	ผลไม้แห้งแบบแช่เยือกแข็ง เช่น มะม่วงเงาะ แช่เยือกแข็ง	Fruits, freeze dried	20 grams
5	ผลไม้ทอด หรืออบกรอบ หรือฉาบ	Fruit-based snacks	Refer to the Category 3 Snack foods

Category 12 Sauces, condiments, spread products and other products)

No.	Food Category		Reference Serving Size
1	ซอสสำหรับจิ้ม เช่น ซอสหมัสตาร์ด น้ำจิ้มไก่ น้ำจิ้มซีฟู้ด น้ำจิ้มแจ่ว	Dipping sauce e.g., mustard sauce, sweet chili sauce, Seafood dipping sauce, <i>Nam-Jim-Jaew</i>	1 tablespoon
2	ซอสราดหน้าพร้อมบริโภค 2.1 ซอสที่มีส่วนผสมของเนื้อสัตว์และ/หรือผัก เช่น ซอสสปาเก็ตตี้ 2.2 ซอสที่ไม่มีส่วนผสมของเนื้อสัตว์และ/หรือผัก เช่น น้ำราดหน้า ข้าวหมูแดง-หมูกรอบ	Ready-to-eat topping sauce 2.1 with meat or vegetables e.g., Spaghetti sauce 2.2 without meat or vegetables e.g., barbecued - crispy pork rice sauce	125 grams 60 grams
3	ซอสที่ใช้กับอาหารเฉพาะอย่าง 3.1 ซอสพิซซ่า 3.2 น้ำจิ้มสุกี้ 3.3 น้ำจิ้มสะเต๊ะ น้ำตัง น้ำปลาหวาน	Entree sauce 3.1 Pizza sauce 3.2 Sukiyaki sauce 3.3 Satay sauce, Nha-Tang,	2 tablespoons 2 tablespoons 2 tablespoons

No.	Food Category		Reference Serving Size
	น้ำจิ้มเหานมเนือง 3.4 ซอสผัด	Nampla-Wan, Nam-Neaung sauce 3.4 Fried sauce	2 tablespoons
4	น้ำส้มสายชู น้ำปลา น้ำเกลือปรุงอาหาร	Vinegar, fish sauce, brine for cooking	1 tablespoon
5	ซอสมะเขือเทศ ซีอิ้ว ซอสพริก ซอสมะละกอ ซีอิ้วหวาน เต้าเจี้ยว ซอสแป้ง เช่น ซอสเย็นตาโฟ	Tomato sauce, soy sauce, chili sauce, papaya sauce, sweet soy sauce, soybean paste, flour sauce (Yen-ta-fo sauce)	1 tablespoon
6	ซอสเปรี้ยว	Worcester sauce	1 teaspoon
7	น้ำผึ้ง น้ำเชื่อม เช่น เมเปิ้ลไซรัป และ ผลิตภัณฑ์ราดหน้าขนมต่าง ๆ	Honey, syrups and toppings	1 tablespoon
8	น้ำตาล	Sugar	1 teaspoon (4 grams)
9	เกลือ (รวมทั้งวัตถุทดแทนเกลือ เกลือ ปรุงรส)	Salt (including salt substitutes, seasoning salts)	1 gram
10	ซูปก้อน ซูปผง ซูปเข้มข้น	Soup, cube or powder or concentrated	The amount for preparing a soup of 150 grams
11	ผงปรุงรส	Seasoning powder	5 grams หรือ 1 teaspoon
12	น้ำปลาร้า	Fermented fish sauce	15 milliliters
13	น้ำพริกเผา น้ำพริกคลุกข้าว เช่น น้ำพริกตาแดง น้ำพริกสวรรค์	Chili paste e.g. Thai chilli paste, chilli mixed powder	1 tablespoon
14	น้ำพริกแกง	Curry paste	15 grams
15	เต้าหู้ยี้	Preserved bean curd	1 small piece (7 grams)
16	น้ำสลัดชนิดต่าง ๆ	Salad dressings	2 tablespoons
17	มายองเนส เนยถั่ว แชนด์วิชสเปรด เช่น ทูน่าสเปรด สังขยาทาขนมปัง	Mayonnaise, peanut butter, sandwich spreads e.g., tuna spread, custard	1 tablespoon
18	แยม เยลลี่ มาร์มาเลด	Jams, jellies, marmalade	1 tablespoon

Category 13 Fats, oils and products

No.	Food Category		Reference Serving Size
1	น้ำมันและไขมันบริโภค	Fat and oil	1 tablespoon
2	เนย และผลิตภัณฑ์	Butter and products	1 tablespoon
3	เนยเทียมและผลิตภัณฑ์	Margarine and products	1 tablespoon
4	น้ำกะทิ	Coconut milk	80 milliliters
5	กะทิผง	Coconut milk, powder	15 grams

Category 14 Miscellaneous

No.	Food Category		Reference Serving Size
1	- ซุปสกัด เช่น ซุปไก่สกัด ซุปเห็ดสกัด - เครื่องดื่มเข้มข้นพร้อมบริโภค - เครื่องดื่มรังนก	- Essence e.g. chicken essence, mushroom essence - Concentrated beverages, ready-to-drink - Bird's nest beverage	40 milliliters
2	เม็ดอม แผ่นอม	Pastille, tablet	1 tablet/piece
3	หมากฝรั่ง	Chewing gum	3 grams

Remark. In case of determining the serving size of a dry food or other food products that need to be reconstituted before consumption (either by adding water or other liquid with insignificant nutrient content), the reference serving size shall be defined based on the food category of such food product as defined in the Table above.

4. Approaches on defining the amount of food in one serving or the amount consumed at each time and the number of serving per container or the number of consumptions per container.

4.1 Defining the amount consumed per serving.

(1) Using household units of measurements such as a cup, a tablespoon (Tbsp.), a teaspoon (tsp.) as appropriate to each food and attach with the amount or weight of food in metric units of measurement in the blanket; for example, “**Amount per serving: 1 glass (200 milliliters)**”. In other cases, the general measurements could be used such as a cup, a glass, a sheet, a tray, a bottle, a box, a piece, or a whole fruit or other units as appropriate for specific products or a fraction; for example, a slice of bread shall be declared as “**Amount per serving: 2 slices (46 grams)**”. However, if the amount of food is not able

to precisely define or because of a variation of the product's size such as a whole fish. Then, the approximate size of the product that is as close as possible to the reference serving size shall be declared; for example, **"Amount per serving: ½ fishes (80 grams include the sauce)"**.

(2) In case that whole food in the container could be finished in one time; for example, as in beverages, it shall be declared as **"Amount per serving: 1 carton (250 milliliters)"**. However, the amount consumed per serving of food product shall not be higher than 200% of its reference serving size.

(3) In case that the food is in a large portion and intended to be consumed in a smaller portion such as a cake, a pizza, or a beverage in 1 liter size, the amount consumed per serving shall be declared as a fraction such as $\frac{1}{2}$, $\frac{1}{3}$, $\frac{1}{4}$ to be as close as possible to its reference serving size. For example, as in a cake, **"Amount per serving: ¼ whole cake (60 grams)"**.

(4) Food in individual pieces that packed together in a large container such as cookies, candies, jellies, regardless of whether each piece is separated in its own container, the amount consumed per serving that declared on the large packaging shall be as follows:

Weight for one piece of food compared to reference serving size	Amount consumed per serving declared on the label	Examples
Less than 50%	Declare as number of pieces/units that is as close as possible to the reference serving size	- 1 candy weighs 1 gram and 1 pack contains 12 candies. - reference serving size of candy is 6 grams. -Thus, it shall be declared as "Amount per serving: 6 candies (6 grams)".
More than 50% but less than 200% and could be finished in	Declared as 1 piece as if it could be finished in one time	- 1 jelly weighs 30 grams and 1 pack contain 5 pieces. - reference serving size of jelly is

Weight for one piece of food compared to reference serving size	Amount consumed per serving declared on the label	Examples
one serving		20 grams. -Thus, it shall be declared as “Amount per serving: 1 jelly (30 grams)”
More than 200%	Declare as a fraction of food as referred to No. 4.1 (3)	- 1 cookie weighs 80 grams and 1 box contains 4 pieces. - reference serving size of cookie is 30 grams. - Thus, it shall be declared as “Amount per serving: ½ cookies (40 grams)” .

(5) Food with uniform physical characteristics such as flour or sugar, the most appropriate units of measurement shall be used to obtain a weight that be as close as possible to its reference serving size. For example, the reference serving size of sugar is 4 grams so it should be measured with a teaspoon to have the closest weight to 4 grams and declared as **“Amount per serving: 1 teaspoon (4 grams)”**.

(6) Food that is packed with water, brine, oil, or other liquid that not intended to consume with the food, the amount consumed per serving shall be calculated from the drained solid of the food only.

4.2. Rounding rules for the household units of measurement in order to define the amount consumed per serving.

Units of measurement	Rounding rules
Cup	Rounding the fraction of weight to $\frac{1}{4}$ or $\frac{1}{3}$ cups If the additional fraction is higher or equal to 2 tablespoons (Tbsp.) but less than $\frac{1}{4}$ cups, it shall be declared as a tablespoon. For example, “Amount per serving: 1 cup 3 Tbsp. (225 grams)” .

Units of measurement	Rounding rules
Tablespoon	• If the fraction is higher or equal to 1 teaspoon but less than 1 tablespoon, it shall be declared as teaspoon.
	• In between 1 to 2 tablespoons, it shall be declared as 1, 1 $\frac{1}{3}$, 1 $\frac{1}{2}$, $\frac{2}{3}$, 2 tablespoons.
	• More than or equal to 2 tablespoons, it shall be declared the number that is as close as to a whole number such as 2 or 3 tablespoons
Teaspoon	If the additional fraction is less than 1 teaspoon, it shall be declared as $\frac{1}{4}$ teaspoon.

Remark 1 cup = 14 tablespoons (for solid food) or 16 tablespoons (liquid)
 1 tablespoon = 3 teaspoons

4.3 Defining the amount consumed per serving in metric system.

(1) For liquid food, it shall be declared as ml. (milliliter) or cm³ (cubic centimeter). For food in other characteristics, the unit of gram shall be used from the actual measuring of the food products.

(2) Rounding rules in the metric system

Amount consumed per serving	Rounding rules
Less than 2	Rounding each time by 0.1
Between 2-5	Rounding each time by 0.5 such as 2.3 grams to 2.5 grams or 2.1 grams to 2 grams
More than 5	Rounding to a whole number according to the universal approach as follow: • If the decimal number is < 0.5, it shall be rounded down to that whole number (in the front) such as 6.2 grams to 6 grams. • If the decimal number is > 0.5, it shall be rounded up by 1 such as 6.7 to 7 grams. • If the decimal number is equal to 0.5 and the whole number (in the front) is an odd number, it shall be rounded up by 1. On the other hand, if it is an even number, it shall be rounded off to that whole

Amount consumed per serving	Rounding rules
	number, for example, 6.5 grams to 6 grams or 7.5 grams to 8 grams.

(3) If the food products could be finished in one time, the amount consumed per serving shall be the weight or total volume of the food products provided in the front part of label.

4.4 Defining the number of serving size per container.

In general, it shall be calculated by dividing the edible portion in the container with the amount consumed per serving as defined the above-mentioned item 4.1 to 4.3.

(1) Rounding rule for the fraction of number of servings per containers.

Number of servings per container	Rounding rules
Less than 2	Declare as 1 or 2 times according to the condition prescribed in No. 4.4 (3).
More than or equal to 2	Rounding decimal value to a whole number such as 2, 3, 4, 5,... If the value is at half and the whole number (in the front) is an odd number, it shall be rounded up by 1. On the other hand, if the whole number is an even number then it should be rounded down as that whole number; for example, 7.5 to 8.

Remark A rounding of the value either up or down, the word “**about**” shall be used; for example, rounding from 3.6 to 4, the number of servings per container shall be declared as “**about 4**”.

(2) If the food in the whole container has a total weight of less than or equal to 100% of its reference serving size, the amount consumed per serving shall be declared as 1.

(3) If food in the whole container has a total weight of higher than

100% but less than or equal to 200% of its reference serving size, the food manufacturer can declare the number of serving per container as either 1 or 2. For example, if the yoghurt (cream) has the reference serving size of 150 grams and the total weight in the containers is 250 grams, its number of serving size could be either 1 or 2 by considering the amount consumed per serving as 250 grams or 125 grams respectively.

4.5 Format for declaring the amount of food in one serving size or the amount consumed per serving and the number of serving per container or the number of consumptions per container.

(1) Any foods with its prescribed reference serving size as provided in the above-mentioned Annex or any foods without a prescribed reference serving size but having the similar characteristics as them, the declaration of the amount consumed per serving shall use the general household units of measurement and attach with the amount in metric system as follow;

5 serving(s) per carton

Amount per serving: 1/5 carton (200 milliliters)

If the food in the container could be wholly consumed in one time, then it shall be exempted from displayingserving(s) per container.

(2) For food other than prescribed in (1), the amount consumed per serving shall be declared using actual amount suggested by the producers or per 100 grams of food or 100 milliliters of food.

However, in the case of raw food such as meat, vegetables and fresh fruits, the amount of nutrients per 100 grams or 100 milliliters of the edible portion shall be declared and the number of servings per container shall be exempted from declaring. The “Amount per 100 grams” or “Amount per 100 milliliters” shall be declared instead of “Amount per Serving: (...)”.

5. Examples of how to define the amount of food in one serving size or the amount consumed at one time and the number of serving per container or the number of consumptions per container.

Example 1 Wafer with vanilla cream filling packaged in the plastic bag with a total weight of 75 grams

Wafer with vanilla cream filling	Explanation
1. Reference serving size is 30 grams. 2. Measure the weight of wafer to be as close as possible to 30 grams which then counted as 6 pieces 3. Therefore, amount consumed per serving: 6 pieces (30 grams). 4. To calculate for the number of serving per containers, the total weight of 75 grams needs to be divided by the amount consumed per serving; $75/30 = 2.5$. Therefore, the number of servings per bag is about 2.5. 5. Declare on the label as 2 serving(s) per bag Amount per serving: 6 pieces (30 grams)	-Annex 2 Group 4 No. 2 -This food will use piece as its unit. (Annex 2 No. 4.1(1) and 4.1(4)) - If the value is higher than 2, it shall be rounded as that whole number and the word “about” shall also be used. (Annex 2 No. 4.4(1).

Example 2 Soy sauce in a glass bottle with a total volume of 700 milliliters

Soy sauce	Explanation
1. Reference serving size is 1 tablespoon. 2. Measuring the weight of the soy sauce in 1 tablespoon and it has with a volume of 15 ml. 3. Therefore, the amount consumed in one serving is 1 Tbsp (15 ml.) 4. Defining the number of servings per container by dividing the total weight of 700 ml. with the amount consumed per serving of 15 ml: $700/15 = 46.6$. Therefore,	- Annex 2, Group 12, No. 5 - The value is higher than 5. The fraction then could be rounded to a whole number and use with the word “about” (Annex 2 Item 4.4 (1))

Soy sauce	Explanation
the number of serving size per container is 47. 5. Declare on the label as About 47 serving(s) per containers Amount per serving: 1 Tbsp. (15 ml.)	

Example 3 Carbonated beverage in peach flavor packaged in plastic bottle with a total volume of 500 milliliters.

Carbonated beverage in peach flavor	Explanation
1. Reference serving size is 200 milliliters. 2. The unit of measurement is defined according to the packaging as a bottle. 3. Therefore, the amount consumed per serving: ½ bottle (250 ml.) 4. Defining the number of servings per container by dividing the total volume of 500 ml. with the amount consumed per serving: $500/250 = 2$. 5. Declare on the label as 2 serving(s) size per bottle Amount per serving: ½ bottle (250 ml.)	- Annex 2 Group 2 No. 2 - The total volume of the food is higher than 200% of the reference serving size. So, it shall be declared as a fraction of food (Item 4.1 (3))

Annex 3

to the Notification of Ministry of Public Health (No. 445) B.E. 2566 (2023)

issued by the virtue of Food Act B.E. 2522 (1979) Re: Nutrition labelling

Thai Reference Dairy Intakes – Thai RDIs

FDA has developed a list of Thai Reference Daily intakes (Thai RDIs) to be used as a reference value for declaring the nutrition information on the food labelling. Moreover, it could also be used for developing new food recipes or a criterion for developing a policy about the nutrition for the general population such as food fortification or for other suitable purposes in the aspect of nutrition. However, it should be noted that these Thai RDIs values are for a healthy general population above the age of three years old in which does not include infants and young children under the age of three years, pregnant women, patients, or other population groups with different nutrition needs compared to the general population.

Thai RDIs were developed based on the Nutrient Reference Values (NRVs) that were defined by Codex Alimentarius Commission (Codex) in which the Daily Intake Reference Values (DIRVs) of the healthy general population aged between 19 and 50 years and the recommended daily amount of energy intake at 2,000 kilocalories were taken into consideration. In addition, other scientific data from Food and Agricultural Organization of the United Nations (FAO), World Health Organization (WHO), Codex Alimentarius Commission (CAC) and other Recognized Authoritative Scientific Bodies (RASBs) including European Food Safety Authority (EFSA) of the European Union (EU), Institute of Medicine (IOM) of the United State of America and Canada, National Health and Medical Research Council and New Zealand Ministry of Health (NHMRC/MOH) of Australia and New Zealand, National Institute of Health and Nutrition (NIHN) of Japan, Nordic Council of Ministers (Nordic) of the Nordic countries and the International Zinc Nutrition Consultative Group (IZINCG) were also included in developing these values. Moreover, the data on the recommended daily amount of reference nutrition intake for Thai population B.E. 2563 (2020) or so-called Dietary Reference Intakes (DRIs)) developed by Department of Health were also considered. However, the defined Thai RDIs values were prescribed to not exceed the Upper Levels of Intake (ULs) of the population of the age of over 3 years.

No.	Nutrient	Thai RDIs	Unit
1.	Total Fat	65	gram (g)
2.	Saturated Fat	20	gram (g)
3.	Cholesterol	300	milligram (mg)
4.	Protein	50	gram (g)
5.	Total Carbohydrate	300	gram (g)
6.	Dietary Fiber	25	gram (g)
7.	Vitamin A	800	microgram RAE (µg RAE)
8.	Vitamin D	15	microgram (µg)
9.	Vitamin E	9	milligram alpha-TE (mg α-TE)
10.	Vitamin K	60	microgram (µg)
11.	Vitamin B1/Thiamin	1.2	milligram (mg)
12.	Vitamin B2/Riboflavin	1.2	milligram (mg)
13.	Niacin	15	milligram NE (mg NE)
14.	Pantothenic Acid / Pantothenate	5	milligram (mg)
15.	Vitamin B6	1.3	milligram (mg)
16.	Biotin	30	microgram (µg)
17.	Folate	400	microgram DFE (µg DFE)
18.	Vitamin B12	2.4	microgram (µg)
19.	Vitamin C	100	milligram (mg)
20.	Calcium	1000	milligram (mg)
21.	Phosphorus	700	milligram (mg)
22.	Magnesium	310	milligram (mg)
23.	Iron	22	milligram (mg)
24.	Iodine	150	microgram (µg)
25.	Zinc	11	milligram (mg)
26.	Selenium	60	microgram (µg)
27.	Copper	900	microgram (µg)

No.	Nutrient	Thai RDIs	Unit
28.	Manganese	3	milligram (mg)
29.	Molybdenum	45	microgram (µg)
30.	Chromium	35	microgram (µg)
31.	Sodium	2000	milligram (mg)
32.	Potassium	3500	milligram (mg)
33.	Chloride	2300	milligram (mg)

Remark

1.The reference amount of total fat, protein and carbohydrate per day were calculated as the recommended amount of energy intake from those nutrients at 30%, 10% and 60% of the total energy of 2,000 kilocalories.

2. The actual energy intake of each individual could be higher or lower than 2,000 kilocalories depending on several factors such as age, gender, and the different level of their physical activity.

Annex 4

to the Notification of Ministry of Public Health (No. 445) B.E. 2566 (2023)
issued by the virtue of Food Act B.E. 2522 (1979) Re: Nutrition labelling

Criteria For Nutrition Claim on the Label

1. Nutrition claim means a declaration of statement, image, mark, symbol, trademark or any information that related to nutrient information of the food including an energy, protein content, fat, carbohydrates, vitamins and minerals. Nutrition claims are divided into nutrient content claim and nutrient comparative claim.

1.1 Nutrient content claim means a claim on the level of the nutrients including the energy value in food such as “source of calcium” and “high in fiber and low in fat” etc.

However, the claim of “free from” or “low” on the label shall complied to these additional conditions as follows:

(1) The claim as “free from” or “low” are not allowed if any foods or food types naturally complied to the prescribed conditions and do not undergo any particular production methods or any recipe modifications that allow a reduction of the nutrients to the prescribed conditions. This is to avoid conveying misleading information that might lead consumers to assume that a particular feature is exclusive to the products made by these particular manufacturers. However, manufacturers may declare a fact on the nutrition information of that particular food or that food types across all brands; for example, “Vegetable cooking oil does not contain Cholesterol.”, or “Vegetable cooking oil is a food that does not contain Cholesterol.”, or “Vegetable cooking oil naturally does not contain Cholesterol.”, Naturally, vegetable cooking oil is a food that does not contain Cholesterol.” etc.

(2) Certain foods or food types produced from improved production techniques or modified recipes, or using substituted raw materials that sets them apart from the general product resulting in a difference in their nutritional content among each formula in the same food types, such as soybean beverage with and without added flavors formulas etc. They might make such a claim if their nutritional content meet the criteria for “free from” or “low.”.

1.2 Nutrient Comparative claim is a comparison of nutrient contents or energy values from two or more food types that are either in the same or similar food categories such as "Less than or Fewer", "More than" "Reduced", "Lite or light" and "added, fortified or enriched" etc. To make this comparative comparison, the compared food or so-called "reference food" are used and there are two comparing approaches as follows:

(1) Comparing with the original recipe of their own

(2) Comparing with the other products in same food type that have nutritional contents that can serve as a representation of a certain product on the market such as average of the nutrient contents from the top 3 products that are popular in the market etc.

However, to declare a comparative claim of either a nutrient content or energy values, the reference food shall not contain such nutrient in "Low" or "Very Low" amount.

To declare a comparative nutrition claim, the following information shall be stated including type of the reference food and a comparative claim of nutrient content or energy value either as an increase or a reduction expressed in a percentage or fraction compared to the reference food. Additionally, the amount of nutrient per the amount consumed per serving on the label shall be stated. For example, to make a claim of "lower sodium", it shall be attached with the statement: "lower amount of sodium by 30% compared to the soy sauce original formula. Soy sauce in low sodium formula contains 280 mg. of sodium per 30 ml. Soy sauce original formula contains 400 mg. Of sodium per 30 ml.".

2. Conditions for making nutrient claims

2.1 Criteria and conditions for making nutrient claims could be divided into two cases as follows:

Case 1 For food with prescribed reference serving size in Annex 2 to this Notification and food with similar consumption characteristics as them that allow to grant the use of prescribed reference serving size in the Annex, they shall make a nutrient claim according to the defined conditions the Table 1 of this Notification. To calculate the nutrient content, it shall follow these conditions as follows.

1) For food with a reference serving size of more than 30 grams or more than 2 tablespoons, the conditions for making a nutrition claim in Table 1 shall be calculated from the amount of food consumed per serving as declared on the label and the amount of food per reference serving sizes

2) For food with a reference serving size of not more than 30 grams or not more than 2 tablespoons, the conditions for making a nutrition claim in Table 1 shall be calculated from the amount of food consumed per serving as declared on the label and two-fold of the amount of reference serving size.

Case 2 For foods that do not follow the conditions in Case 1, to make a nutrition claim, it shall be calculated from the amount of food in 100 grams or 100 milliliters using prescribed conditions in Table 2 of this Annex.

2.2 If foods as in No. 2.1 meet the criteria for making nutrition claims under the conditions in the Table 1 and Table 2 of this Annex, it shall have the nutrient contents as prescribed below per amount of food consumed per serving as declared on the label and per the amount of reference serving size, or per amount of food consumed per serving as declared on the label and per two-fold of the amount of reference serving size for food with reference serving size of less than 30 grams or less than 2 tablespoons as in Case 1 or per 100 grams or 100 milliliters as in Case 2.

Total Fat	more than 13 grams or,
Saturated fat	more than 4 grams or,
Cholesterol	more than 60 milligrams or,
Sodium	more than 300 milligrams or,
Total sugar	more than 13 grams or,

Then, to declare any nutrition claims, if the amount of the total fat or saturated fat or cholesterol or sodium or total sugar are in the amount as prescribed above, it shall be declared attached to the nutrition claim statement. Moreover, the nutrition claim statement shall be in the largest font size or in the area that is most visible on the label. For the attached statement, the font size needs to be at least half the size of the statement on the nutrition claims.

Example,

“Low Sodium

Total Fat 14 grams per 200 milliliters”

2.3 Food with a statement “For Health” (healthy, healthful, healthiness, health, healthfully, healthfulness, healthily) or other similar statements shall comply to these conditions as follows:

(1) Complied with the criteria specified in Table 1 or Table 2 for making a claim on "low fat" or "low saturated fat" food as the case may apply

(2) Contain nutrient content as prescribed below per amount of food consumed per serving as declared on the label and per reference serving size or per amount of food consumed per serving as declared on the label and per twice of the reference serving size for food with reference serving size of not more than 30 grams or not more than 2 tablespoons as in Case 1 or per 100 grams or 100 milliliters as in Case 2 as follows:

Sodium	not more than 300 mg and,
Cholesterol	not more than 60 milligrams and,
Total sugar	not more than 13 grams and,
Protein	not more than 5 grams and

Also contain at least one of these nutrients

Fiber at least 10 percent of Thai RDI

Vitamin A, Vitamin B 1, Vitamin B2, Calcium, and Iron at least 15 percent of Thai RDI

Remark For fresh vegetables or fruits, the requirements for protein, fibers, Vitamin A, Vitamin B1, Vitamin B2, Calcium and Iron shall be exempted.

2.4 Other conditions

If there is a declaration of any specific nutrients and its content outside of nutrition labelling frame on the label including the declaration of any specific nutrients and its content that are the part of the name which is not intended to make a claim but are meant to inform its content to the consumers and do not comply with prescribed criteria for making a claim, it shall be stated that it is not intended to make a claim attached to a declaration of its nutrient content. The examples of the statements are “contains sodium 200 mg. per 30 ml. - not a low sodium food” or “contains vitamin C 5 mg. per 150 grams – not a food that is a source of vitamin C” etc.

3. Examples of nutrition claims

Example 1 Ultra Heat Treatment (UHT) Yoghurt Drink in a 180 milliliters carton box

Details	Description
From an analysis result, the product contains the nutrients per 100 ml. of food as follows; Total Fat 1.83 g. Saturated fat 0.70 g. Cholesterol 0 mg. Sodium 36.44 mg. Total sugar 5.6 g.	
1. reference serving size is 150 ml.	- Annex 2 Group 1 No. 3
2. Amount consumed per serving is 1 carton (180 ml.)	- If food in the container could be finished in one time, the total amount in the container shall be used for the calculation such as 1 carton. (Annex 2 No. 4.1 (2))
3. This yoghurt drink was specifically developed to possibly make nutrition claim. Therefore, a claim like “low fat” could possibly use, If its nutrient contents complied with the prescribed criteria.	- The claims of “free from” or “low” shall not be used if the food naturally complied with those certain criteria. (Annex 4 No. 1.1) - To make a claim of “low fat”, the amount of fat shall be not more than 3 grams per reference serving size and per amount consumed per serving declared on the label (Annex 4 Table 1)

Details	Description
4. Calculation 4.1 The amount of total fat its reference serving size $= (1.83/100) \times 150$ $= 2.7 \text{ grams and could be rounded as 3.0 grams.}$ 4.2 The amount of total fat per the amount consumed per serving declared on the label. $= (1.83/100) \times 180$ $= 3.3 \text{ grams and could be rounded to 3.5 grams}$ <u>To conclude</u> This drinking yoghurt cannot use a nutrient claim of “low fat”.	-This food follows the requirements No. 2.1 Case 1 of Annex 4. Therefore, criteria prescribed in Table 1 will be used to assess whether it could make a claim. - Using the rounding rules No. 2.6 of Annex 1, the fat content will then be note more than 3 grams. - Using the rounding rules No. 2.6 of Annex 1, the fat content will be rounded to more than 3 grams.

Example 2 Ultra Heat Treatment (UHT) Yoghurt Drink in a 150 milliliters carton box (same as the reference serving size) containing the same nutrients as the food in example 1.

Details	Description
1. This yoghurt drink can make a claim of “low fat” since it contains a total fat of less than 3 grams per reference serving size <u>and</u> per amount consumed per serving. 2. However, the amount of total fat, saturated fat, cholesterol, sodium and total sugar per reference serving size and per the amount consumed per serving shall also comply with the prescribed criteria. - Total fat = $(1.83/100) \times 150$ = 2.7 grams and could be <u>rounded to 3.0 grams</u> - Total saturated fat = $(0.70/100) \times 150$ = 1.05 grams and <u>could be rounded to 1.0 grams</u> - Cholesterol = $(0/100) \times 150$ = <u>0 milligrams</u> - Sodium = $(36.44/100) \times 150$ = 54.66 milligrams could be <u>rounded to 55 milligrams</u> - Total sugar = $(5.6/100) \times 150$ = 8.4 grams and could be <u>rounded as 8.0 grams</u> <u>To conclude</u> This yoghurt drink in the example 2 could make a claim of “low fat” and doesn’t need to be attached with the amount of total fat, saturated fat, cholesterol, sodium, or total sugar.	- It shall be aligned with the prescribed criteria No. 2.2 of Annex 4 • Total Fat not more than 13 grams • Saturated fat not more than 4 grams • Cholesterol not more than 60 milligrams • Sodium not more than 300 milligrams • Total sugar not more than 13 grams - Using the prescribed round rules No. 2.6 of the Annex 1

Example 3 Shrimp cracker in a plastic bag with a total weight of 75 grams

Details	Description
From analysis results, the product contains the nutrients per 100 ml. of food as follows; Total Fat 32.14 g. Saturated fat 12.99 g. Cholesterol 0 mg. Sodium 981.5 mg. Total sugar 4.1 g. Calcium 70.5 mg. Iron 20.0 mg. and the amount consumed per serving is 30 grams. 1. Reference serving size is 30 grams. 2. To calculate the nutrient claim, it shall be calculated from weight of shrimp cracker at 30 and 60 grams 2.1 Calcium (1) using the weight of 30 grams $= (70.5/100) \times 30$ $= 21.15 \text{ milligrams}$ Calculate as a %RDI $= (21.15/1000) \times 100$ $= 2.12 \% \text{ and rounded to } 2\%$ (2) using the weight of 60 grams $= (70.5/100) \times 60$ $= 42.3 \text{ milligrams}$ Calculate as %RDI $= (42.3/1000) \times 100$	- Annex 2 Group 3 No. 1 - If any foods have reference serving size of not more than 30 grams or not more than 2 Tbsp., the amount consumed per serving on the label and two-fold of the amount of reference serving size shall be used for calculation. - Thai RDI for calcium is 1,000 milligrams (Annex 3 No. 20) - Rounding rules No. 2.6 of the Annex 1

Details	Description
= 4.23% and <u>rounded to 4%</u> <u>To conclude</u> This shrimp cracker cannot be make a nutrient claim on calcium. 2.2 Iron (1) Calculate per 30 grams = $(20.0/100) \times 30$ = 6 milligrams Calculate as a %RDI = $(6/22) \times 100$ = 27.3 % and <u>rounded as 27 %</u> (2) Calculate per 60 grams = $(20.0/100) \times 60$ = 12 milligrams Calculate as a %RDI = $(12/22) \times 100$ = 54.5% <u>rounded to 54 %</u>	- To make a claim of “contain” or “source of”, it shall contain the nutrient at more than or equal to 15% of Thai RDI per amount consumed per serving and per two-fold of the reference serving size - Thai RDI of Iron is 22 milligrams. (Annex 3 No. 22) - Rounding rules No. 2.6 of Annex 1
<u>To conclude</u> This shrimp cracker can make a claim as “contain iron” or “source of iron”.	- To make a claim of “contain” or “source of”, it shall contain the nutrient at more than or equal to 15% of Thai RDI per amount consumed per serving and per two-fold of the reference serving size
3. However, the amount of total fat, saturated fat, cholesterol, sodium and total sugar per reference serving size and per the amount consumed per serving shall also complied with the prescribed criteria	- It shall be aligned with the prescribed criteria No. 2.2 of Annex 4. In this case, the calculation shall be made from the amount consumed per serving and per two-fold of the reference serving size

Details	Description
(1) Calculate per 30 grams • Total Fat $(32.14/100) \times 30$ = 9.64 grams rounded to <u>10 grams</u> • Saturated fat $(12.99/100) \times 30$ = 3.897 grams rounded to <u>4 grams</u> • Cholesterol $(0/100) \times 30$ = <u>0 milligrams</u> • Sodium $(981.5/100) \times 30$ = 294.45 milligrams rounded to <u>290 milligrams</u>. • Total sugar $(4.1/100) \times 30$ = 1.23 grams rounded to <u>1 gram</u> (2) Calculate per 60 grams • Total Fat $(32.14/100) \times 60$ = 19.28 grams rounded to <u>19 grams</u> • Saturated fat $(12.99/100) \times 60$ = 7.794 grams rounded to <u>8 grams</u> • Cholesterol $(0/100) \times 60$ = <u>0 milligrams</u> • Sodium $(981.5/100) \times 60$ = 590 milligrams rounded to <u>290 milligrams</u>. • Total sugar $(4.1/100) \times 60$ = 2.46 grams rounded to <u>2 grams</u>	because its reference serving size is not more than 30 grams. • Total Fat shall be not more than 13 grams • Saturated fat shall be not more than 4 grams. • Cholesterol shall be not more than 60 milligrams. • Sodium shall be not more than 300 milligrams. • Total sugar shall be not more than 13 grams. - Rounding rules No. 2.6 of the Annex 1
<u>To conclude</u> This shrimp cracker can make a claim of “contain iron” or “source of iron”. However, the declaration of the amount of total fat, saturated fat and sodium need to be attached to the claim	

Details	Description
statement with a size of not a half of the claim statement “Source of Iron Total fat of 19 g. Saturated fat of 8 g. Sodium of 590 mg. per 60 g. of a shrimp snack.”

Table 1 Conditions for making nutrition claims using the criteria per the amount of reference serving size and per the amount consumed per serving on the label (For food under the specified condition No. 2.1 No. 1)

Energy/ Nutrients	Claim statement	Conditions (per the amount of reference serving size and per the amount consumed per serving on the label)*	Additional conditions
Energy	free, without, free of, no, zero	Contains less than 5 kilocalories	1. These claims shall not be used if the certain food naturally complied with these prescribed conditions. 2. It shall follow the conditions No. 1.1 and 2.2 of this Annex
	low, few, low in, low source of, contains a small amount of	Contains not more than or equal to 40 kilocalories	
	reduced, reduced in, less, fewer, lower, lower in	Lower amount of total fat at more than or equal to 25 percent compared to the reference food	1. These claims shall not be used if the reference food is a “low energy” food. 2. It shall follow the conditions 1.2 and 2.2 of this Annex
	light, lite	1. Lower amount of fat at more than or equal to 50% compared to the reference food <u>or</u> 2. Lower amount of energy at more than or equal to 1/3 parts compared to the reference food. (In case that such product has the energy from fat less than 50% of the total energy)	1. These claims shall not be used if the reference food is a “low fat” or “low energy” food. 2. It shall follow the conditions 1.2 and 2.2 of this Annex. 3. If the food with any of these claims contained the energy less than 40 kilocalories or fat less than 3 grams per reference serving size, it shall be exempted from declaring the percentage or fraction of reduction for the reduced amount of energy.

Energy/ Nutrients	Claim statement	Conditions (per the amount of reference serving size and per the amount consumed per serving on the label)*	Additional conditions
total fat, fat	free, without, free of, no, zero, nonfat	Contains total fat of less than 0.5 grams	1. These claims shall not be used if the certain food naturally complied with these prescribed conditions. 2. When fat is used as an ingredient in food or when some of the ingredients are generally known to contain fat, that ingredient shall be marked and stated as “having almost no impact on the fat content”. 3. It shall follow the conditions 1.1 and 2.2 of this Annex
	low, low in, low source of, little, contains a small amount of	Contains total fat not more than or equal to 3 grams	1. These claims shall not be used if the certain food naturally complied with these prescribed conditions. 2. It shall follow the conditions 1.1 and 2.2 of this Annex
	reduced, reduced in, lower, lower in, less	Reduced total fat content of more than or equal to 25 percent compared to the reference food	1. These claims shall not be used if the reference food is a “low fat” food 2. It shall follow the conditions 1.2 and 2.2 of this Annex
saturated fat	free, without, free of, no, zero	1. Contain saturated fat less than 0.5 grams and 2. Amount of trans-fat less than 0.5 grams	1. These claims shall not be used if the certain food naturally complied with these prescribed conditions. 2. When some of the ingredients are generally known to contain saturated fat, that ingredient shall be marked and stated as “having almost no impact on the

Energy/ Nutrients	Claim statement	Conditions (per the amount of reference serving size and per the amount consumed per serving on the label)*	Additional conditions
			saturated fat content”. 3. If the product contains more than or equal to 2 milligrams of cholesterol or more than or equal to 0.5 grams of total fat per reference serving size, the amount of cholesterol or total fat (if applicable) shall be declared attached to each of the claims on the amount of saturated fat with a font size that is not less than half of its claim statement. 4. It shall follow the condition 1.1 and 2.2 of this Annex
	low, low in, low source of, a little	1. Contain saturated fat of not more than or equal to 1 gram and 2. Energy from saturated fat not more than or equal to 10 percent of the total energy	1. These claims shall not be used if the certain food naturally complied with these prescribed conditions. 2. If the product contains more than or equal to 2 milligrams of cholesterol or more than or equal to 3 grams of total fat per reference serving size, the amount of cholesterol or total fat (if applicable) shall be declared attached to each of the claims on the amount of saturated fat with a font size that is not less than half of its claim statement. 3. It shall follow the conditions 1.1 and 2.2 of this Annex
	reduced, reduced in, lower, lower in, less	Reduced saturated fat content of more than or	1. These claims shall not be used if the reference food is a “low

Energy/ Nutrients	Claim statement	Conditions (per the amount of reference serving size and per the amount consumed per serving on the label)*	Additional conditions
		equal to 25 percent compared to the reference food	saturated fat food”. 2. If the product contains more than or equal to 2 milligrams of cholesterol or more than or equal to 3 grams of total fat per reference serving size, the amount of cholesterol or total fat (if applicable) shall be declared attached to each of the claims on the amount of saturated fat with a font size that is not less than half of its claim statement. 3. It shall follow the condition 1.2 and 2.2 of this Annex
cholesterol	free, without, free of, no, zero	1. Contain cholesterol less than 2 milligrams and 2. Contain saturated fat not more than or equal to 2 grams	1. These claims shall not be used if the certain food naturally complied with these prescribed conditions. 2. When some of the ingredients are generally known to contain cholesterol, that ingredient shall be marked and stated as “having almost no impact on the cholesterol content” 3. If the product contains total fat more than 13 milligrams per reference serving size and the amount consumed per serving on the label, the amount of total fat per the amount consumed per serving on the label shall be declared attached with the claim statements on all sides of the

Energy/ Nutrients	Claim statement	Conditions (per the amount of reference serving size and per the amount consumed per serving on the label)*	Additional conditions
			label. If the claims are declared on multiple positions on the label, it shall be attached to the most noticeable claim statement on the label with a font size of not less than half of the claim statements. 4. It shall follow the conditions 1.1 and 2.2 of this Annex
	low, low in, low source of, little	1. Contain cholesterol not more than or equal to 20 milligrams and 2. Contain saturated fat not more than or equal to 2 grams	1. These claims shall not be used if the certain food naturally complied with these prescribed conditions. 2. If the product contains total fat more than 13 milligrams per reference serving size and the amount consumed per serving on the label, the amount of total fat per the amount consumed per serving on the label shall be declared attached with the claim statements on all sides of the label. If the claims are declared on multiple positions on the label, it shall be attached to the most noticeable claim statement on the label with a font size of not less than half of the claim statements. 3. It shall follow the conditions 1.1 and 2.2 of this Annex

Energy/ Nutrients	Claim statement	Conditions (per the amount of reference serving size and per the amount consumed per serving on the label)*	Additional conditions
	reduced, reduced in, lower, lower in, less	1. Reduced total fat content more than or equal to 25 percent compared to the reference food and 2. Contain saturated fat not more than or equal to 2 grams	1. These claims shall not be used if the reference food is a “low cholesterol food”. 2. It shall follow the conditions in 1.2 and 2.2 of this Annex 3. If the products contain total fat more than 13 grams per reference serving size and per amount of consumed food per serving on the label, the amount of total fat per the amount of consumed food per serving on the label shall be declared attached to the claim statement for the reduced amount of cholesterol compared to reference food with the font size of not less than half of the claim statement.
sodium	free, without, free of, no, zero	Contain sodium less than 5 milligrams	1. These claims shall not be used if the certain food naturally complied with these prescribed conditions. 2. It shall be calculated as the amount of sodium in food not as salt (Sodium chloride). 3. When salt is contained in the food or when some of the ingredients are generally known to contain sodium, that ingredient shall be marked and stated as “having almost no impact on the

Energy/ Nutrients	Claim statement	Conditions (per the amount of reference serving size and per the amount consumed per serving on the label)*	Additional conditions
			sodium content.” 4. It shall follow the conditions 1.1 and 2.2 of this Annex
	salt free, without salt	It shall follow the conditions and additional conditions of “free of sodium”	
	very low, very low in	Contain sodium less than 35 milligrams	1. These claims shall not be used if the certain food naturally complied with these prescribed conditions.
	low, low in, low source of, little	Contain sodium less than 140 milligrams	2. It shall be calculated as the amount of sodium in food not as salt (Sodium chloride) and 3. It shall follow the conditions in 1.1 and 2.2 of this Annex
	reduced, reduced in, lower, lower in, less	Reduced sodium content of more than or equal to 25 percent compared to the reference food	1. These claims shall not be used if the reference food is a “low sodium food”. 2. It shall follow the conditions 1.2 and 2.2 of this Annex
	light in, lite in	Reduced sodium content of more than or equal to 50 percent compared to the reference food	1. These claims shall not be used if the reference food is a “low sodium food”. 2. It shall follow the conditions 1.2 and 2.2 of this Annex
	unsalted, no salt, no salt added, without salt added	1. No salt added during the production process and 2. The reference food shall be similar to the product in which it is normally used salt in the production process.	If the product does not comply with the conditions of “free of salt”, it shall be attached with the statement “not a food that is free from sodium”

Energy/ Nutrients	Claim statement	Conditions (per the amount of reference serving size and per the amount consumed per serving on the label)*	Additional conditions
	lightly salted	Adding salt less than normal with more than or equal to 50 percent reduction	If food does not complied with the conditions of “low sodium”, it shall be attached to the statement of “not a low sodium food”
sugars (mean mono- and di- saccharides)	free, without, free of, no, zero, sugarless	Contain sugar less than 0.5 grams	1. These claims shall not be used if the certain food naturally complied with these prescribed conditions. 2. When sugar is contained in a food or when some of the ingredients are generally known to contain sugar, that ingredient shall be marked and stated as “having almost no impact on the sugar content.” 3. If food complied with the conditions for “low energy” or “reduced energy” or “lite energy”, it shall declare these claim statements on the label as well. 4. If food does not comply with the conditions for “low energy” or “reduced energy” or “lite energy”, it shall be labelled with the statement “not a low energy food” or “not a reduced energy food” or “not a food for weight control” respectively 5. It shall follow the conditions 1.1 and 2.2 of this Annex
	reduced, reduced in, lower, lower in, less	Reduced sugar content of more than or equal to 25	It shall follow the condition 1.2 and 2.2 of this Annex

Energy/ Nutrients	Claim statement	Conditions (per the amount of reference serving size and per the amount consumed per serving on the label)*	Additional conditions
		percent compared to the reference food	
	no sugar added, no added sugar, without added sugar	1. Do not contain ingredients that was added with sugar or adding sugar to the product such as yam, jelly, concentrated juice or sweetened condensed milk and 2. Not adding sugar or other ingredients containing sugar to act as a sugar substitute during the production or packaging of the product and 3. Sugar that is obtained from the production process (if occurred) shall follow the conditions of “free from/without” and 4. Reference food shall be added with sugar as its ingredient. However, the product shall not be added with sugar.	If food does not follow the conditions for “low energy” or “reduced energy”, it shall be stated with “not a low energy food” or “not a reduced energy food”
	unsweetened, contains no added sweeteners	These claims shall be used for the food that naturally contains high amount of sugar such as fruit juice. However, the claim of “sugar free” shall not be used.	

Energy/ Nutrients	Claim statement	Conditions (per the amount of reference serving size and per the amount consumed per serving on the label)*	Additional conditions
protein and dietary fiber, fiber	high, rich in, excellent source of	Contain protein or dietary fiber more than or equal to 20 percent of Thai RDIs**	1. To make a claim on dietary fiber, if the amount of total fat does not comply with the conditions for “low fat”, it shall be attached with the amount of total fat per the amount of consumed food per serving on the label with the font size of not less than half of the claim statement. 2. It shall follow condition 2.2 of this Annex.
	good source, contains, provides	Contain protein or dietary fiber more than 10 percent of Thai RDIs**	1. To make a claim on dietary fiber, if the amount of total fat does not comply with the conditions for “low fat”, it shall be attached with the amount of total fat per the amount of consumed food per serving on the label with the font size of not less than half of the claim statement. 2. It shall follow condition 2.2 of this Annex.
vitamins and minerals, excluding sodium	high, rich in, excellent source of	Contains vitamins or minerals more than or equal to 30 percent of the Thai RDIs**	1. It shall follow the condition 2.2 of this Annex
	good source, contains, provides	Contain vitamins or minerals more than 15 percent of Thai RDIs**	1. It shall follow the conditions 2.2 of this Annex
protein, dietary fiber	increased, more, added, fortified,	The nutrient to be claimed in the products shall be more	1. To make a claim on dietary fiber, if the amount of total fat does

Energy/ Nutrients	Claim statement	Conditions (per the amount of reference serving size and per the amount consumed per serving on the label)*	Additional conditions
vitamins and minerals, excluding sodium	enriched, extra, plus	than the amount in the reference food with more than or equal to 10 percent of Thai RDIs**	not comply with the conditions for “low fat”, it shall be attached with the amount of total fat per the amount of consumed food per serving on the label with the font size of not less than half of the claim statement. 2. It shall follow condition 2.2 of this Annex.

Remark

* For food products with a reference serving size of not more than or equal to 30 grams or not more than or equal to 2 tablespoons, the conditions for making a claim in Table 1 shall be calculated from the amount consumed per serving and two-fold of the amount of the reference serving size

** Thai RDIs mean Thai Reference Daily Intakes, Thai RDIs.

Table 2 Conditions for making a nutrition claims using criteria for 100 grams or 100 milliliters (for food under condition 2.1 Case 2)

Energy/nutrients	Claim statements	Conditions	
		Per 100 grams of food (solid food)	Per 100 milliliters of food (liquid food)
energy	free, without, free of, no	-	1. Contain energy not more than or equal 4 kilocalories and 2. It shall follow the condition 1.1 of this Annex .
	low	1. Contain the energy not more than or equal to 40 kilocalories and 2. It shall follow the conditions 1.1 and 2.2 of this Annex	1. Contain the energy not more than or equal to 20 kilocalories and 2. It shall follow the conditions 1.1 and 2.2 of this Annex
	reduced, reduced in, less, less than, fewer, lower, lower in	1. Reduced amount of energy with more than or equal to 25 percent compared to other products in the same or similar food types and 2. The reduced amount of energy shall be more than or equal to 40 kilocalories and 3. It shall follow the condition 1.2 and 2.2 of this Annex.	1. Reduced amount of energy with more than or equal to 25 percent compared to other products in the same or similar food types and 2. The reduced amount of energy shall be more than or equal to 40 kilocalories and 3. It shall follow the condition 1.2 and 2.2 of this Annex.
total fat, fat	free, without, free of, no	1. Contain total fat not more than or equal to 0.5 grams and 2. It shall follow the conditions 1.1 and 2.2 of this Annex	1. Contain total fat not more than or equal to 0.5 grams and 2. It shall follow the conditions 1.1 and 2.2 of this Annex
	low	1. Contain total fat not more than or equal to 3 grams and 2. It shall follow the condition 1.1 and 2.2 of this Annex	1. Contain total fat not more than or equal to 1.5 grams and 2. It shall follow the condition 1.1 and 2.2 of this Annex
	reduced, reduced in, less, less than, lower, lower in)	1. Reduced total fat content of more than or equal to 25 percent compared to other products in the same or similar food types and 2. The reduced amount of total fat shall be more than or equal to 3	1. Reduced total fat content of more than or equal to 25 percent compared to other products in the same or similar food types and 2. The reduced amount of total fat shall be more than or equal to 1.5

Energy/nutrients	Claim statements	Conditions	
		Per 100 grams of food (solid food)	Per 100 milliliters of food (liquid food)
		grams and 3. It shall follow the conditions 1.2 and 2.2 of this Annex	grams and 3. It shall follow the conditions 1.2 and 2.2 of this Annex
saturated fat	free, without, free of, no	1. Contain saturated fat not more than or equal to 0.1 grams and 2. It shall follow the condition 1.1 and 2.2 of this Annex	1. Contain saturated fat not more than or equal to 0.1 grams and 2. It shall follow the condition 1.1 and 2.2 of this Annex
	low	1. Contain saturated fat not more than or equal to 1.5 grams and 2. Contain energy from saturated fat not more than or equal to 10 percent of the total energy and 3. It shall follow the conditions 1.1 and 2.2 of this Annex	1. Contain saturated fat not more than or equal to 0.75 grams and 2. Contain energy from saturated fat not more than or equal to 10 percent of the total energy and 3. It shall follow the conditions 1.1 and 2.2 of this Annex
	reduced, reduced in, less, less than, lower, lower in	1. Reduced saturated fat content of more than or equal to 25 percent compared to other products in the same or similar food types and 2. The reduced amount of saturated fat shall be more than or equal to 1.5 grams and 3. It shall follow the conditions 1.2 and 2.2 of this Annex	1. Reduced saturated fat content of more than or equal to 25 percent compared to other products in the same or similar food types and 2. The reduced amount of saturated fat shall be more than or equal to 0.75 grams and 3. It shall follow the conditions 1.2 and 2.2 of this Annex
cholesterol	free, without, free of, no	1. Contain cholesterol not more than or equal to 5 milligrams and 2. Contain saturated fat not more than or equal to 1.5 grams and 3. Contain energy from saturated fat not more than or equal to 10 percent of the total energy 4. It shall follow condition 1.1 and 2.2 of this Annex.	1. Contain cholesterol not more than or equal to 5 milligrams and 2. Contain saturated fat not more than or equal to 0.75 grams and 3. Contain energy from saturated fat not more than or equal to 10 percent of the total energy 4. It shall follow condition 1.1 and 2.2 of this Annex.
	low	1. Contain cholesterol not more than or equal to 20 milligrams and	1. Contain cholesterol not more than or equal to 10 milligrams and

Energy/nutrients	Claim statements	Conditions	
		Per 100 grams of food (solid food)	Per 100 milliliters of food (liquid food)
		2. Contain saturated fat not more than or equal to 1.5 grams and 3. Contain energy from saturated fat not more than or equal to 10 percent of the total energy 3. It shall follow condition 1.1 and 2.2 of this Annex.	2. Contain saturated fat not more than or equal to 0.75 grams and 3. Contain energy from saturated fat not more than or equal to 10 percent of the total energy 3. It shall follow condition 1.1 and 2.2 of this Annex.
	reduced, reduced in, less, less than, lower, lower in	1. Reduced cholesterol content of more than or equal to 25 percent compared to other products in the same or similar food types and 2. The reduced amount of cholesterol shall be more than or equal to 20 milligrams and 3. It shall follow condition 1.2 and 2.2 of this Annex.	1. Reduced cholesterol content of more than or equal to 25 percent compared to other products in the same or similar food types and 2. The reduced amount of cholesterol shall be more than or equal to 10 milligrams and 3. It shall follow condition 1.2 and 2.2 of this Annex.
sugars	free, without, free of, no	1. Contain sugar not more than or equal to 0.5 grams and 2. It shall follow condition 1.1 and 2.2 if this Annex	1. Contain sugar not more than or equal to 0.5 grams and 2. It shall follow condition 1.1 and 2.2 if this Annex
	reduced, reduced in, less, less than, lower, lower in	1. Reduced sugar content of more than or equal to 25 percent compared to other products in the same or similar food types and 2. It shall follow conditions 1.2 and 2.2 of this Annex.	1. Reduced sugar content of more than or equal to 25 percent compared to other products in the same or similar food types and 2. It shall follow conditions 1.2 and 2.2 of this Annex.
sodium	free, without, free of, no	1. Contain sodium not more than or equal to 5 milligrams and 2. It shall follow condition 1.1 and 2.2 of this Annex.	1. Contain sodium not more than or equal to 5 milligrams and 2. It shall follow condition 1.1 and 2.2 of this Annex.
	very low	1. Contain sodium not more than or equal to 40 milligrams and 2. It shall follow condition 1.1 and 2.2 of this Annex	1. Contain sodium not more than or equal to 20 milligrams and 2. It shall follow condition 1.1 and 2.2 of this Annex

Energy/nutrients	Claim statements	Conditions	
		Per 100 grams of food (solid food)	Per 100 milliliters of food (liquid food)
	low	1. Contain sodium not more than equal to 120 milligrams. 2. It shall follow condition 1.1 and 2.2 of this Annex	1. Contain sodium not more than or equal to 60 milligrams. 2. It shall follow condition 1.1 and 2.2 of this Annex
	reduced, reduced in, less, less than, lower, lower in	1. Reduced sodium content of more than or equal to 25 percent compared to other products in the same or similar food types and 2. The reduced amount of sodium shall be more than or equal to 120 milligrams and 3. It shall follow condition 1.2 and 2.2 of this Annex.	1. Reduced sodium content of more than or equal to 25 percent compared to other products in the same or similar food types and 2. The reduced amount of sodium shall be more than or equal to 60 milligrams and 3. It shall follow condition 1.2 and 2.2 of this Annex.
dietary fiber, fiber	good source, contain, provide	1. Contain dietary fiber more than or equal to 3 grams per 100 grams of food or more than or equal to 1.5 grams per energy value of 100 kilocalories and 2. It shall follow condition 1.1 and 2.2 of this Annex	1. Contain dietary fiber more than or equal to 1.5 grams per energy value of 100 kilocalories and 2. It shall follow condition 1.1 and 2.2 of this Annex
	high, rich, rich in, excellent source of	1. Contain dietary fiber more than or equal to 6 grams per 100 grams of food or more than or equal to 3 grams per energy value of 100 kilocalories and 2. It shall follow condition 1.1 and 2.2 of this Annex	1. Contain dietary fiber more than or equal to 3 grams per energy value of 100 kilocalories and 2. It shall follow condition 1.1 and 2.2 of this Annex
	increased, more than, added, enriched, fortified	1. The increased amount of dietary fiber shall be more than or equal to 25 percent compared to other products in the same or similar food types and 2. The increased amount of the dietary fiber shall be more than or equal to 3 grams per 100 grams of food or	1. The increased amount of the dietary fiber shall be more than or equal to 25 percent compared to other products in the same or similar food types and 2. The increased amount of the dietary fiber shall be more than or equal to 1.5 grams per 100

Energy/nutrients	Claim statements	Conditions	
		Per 100 grams of food (solid food)	Per 100 milliliters of food (liquid food)
		more than or equal to 1.5 grams per 100 kilocalories and 3. It shall follow condition 1.2 and 2.2 of this Annex	kilocalories and 3. It shall follow condition 1.2 and 2.2 of this Annex.
protein	good source, contains, provides	1. Contain protein more than or equal to 5 grams per 100 grams of food or more than or equal to 2.5 grams per 100 kilocalories and 2. It shall follow the condition 1.1 and 2.2 of this Annex	1. Contain protein more than or equal to 2.5 grams of 100 milliliters of food or 100 kilocalories and 2. It shall follow the condition 1.1 and 2.2 of this Annex
	high, rich, rich in, excellent source of	1. Contain protein more than or equal to 10 grams per 100 grams of food or more than or equal to 5 grams per 100 kilocalories and 2. It shall follow condition 1.1 and 2.2 of this Annex	1. Contain protein more than or equal to 5 grams of 100 milliliters of food or 100 kilocalories and 2. It shall follow condition 1.1 and 2.2 of this Annex.
	increased, more than, added, enriched, fortified	1. The increased amount of protein shall be more than or equal to 25 percent compared to other products in the same or similar food types and 2. The increased amount of protein shall be more than or equal to 5 grams per 100 grams of food or more than or equal to 2.5 grams per 100 kilocalories and 3. It shall follow condition 1.2 and 2.2 of this Annex.	1. The increased amount of protein shall be more than or equal to 25 percent compared to other products in the same or similar food types and 2. The increased amount of protein shall be more than or equal to 2.5 grams per 100 grams of food or per 100 kilocalories and 3. It shall follow condition 1.2 and 2.2 of this Annex.

Energy/nutrients	Claim statements	Conditions	
		Per 100 grams of food (solid food)	Per 100 milliliters of food (liquid food)
vitamins and minerals, excluding sodium	good source, contains, provides	1. Contain vitamins or minerals more than or equal to 15 percent of Thai RDIs* per 100 grams of food more than or equal to 5 percent of the Thai RDIs* per 100 kilocalories and 2. It shall follow condition 1.1 and 2.2 of this Annex.	1. Contain vitamins or minerals more than or equal to 7.5 percent of Thai RDIs* per 100 milliliters of food or more than or equal to 5 percent of the Thai RDIs* per 100 kilocalories and 2. It shall follow condition 1.1 and 2.2 of this Annex.
	high, rich, rich in, excellent source of	1. Contain vitamins or minerals more than or equal to 30 percent of Thai RDIs* per 100 grams of food or more than or equal to 10 percent of the Thai RDIs* per 100 kilocalories and 2. It shall follow condition 1.1 and 2.2 of this Annex.	1. Contain vitamins or minerals more than or equal to 15 percent of Thai RDIs* per 100 milliliters of food or more than or equal to 10 percent of the Thai RDIs* per 100 kilocalories and 2. It shall follow condition 1.1 and 2.2 of this Annex.
	increased, more than, added, enriched, fortified	1. The increased amount of vitamins or minerals shall be more than or equal to 10 percent of Thai RDIs* compared to the reference food and 2. It shall follow condition 1.2 and 2.2 of this Annex.	1. The increased amount of vitamins or minerals shall be more than or equal to 10 percent of Thai RDIs* compared to the reference food and 2. It shall follow condition 1.2 and 2.2 of this Annex.

Remark

* Thai RDIs mean Thai Reference Daily Intakes, Thai RDIs
